

## Test Analyst

**We are looking for a dedicated test analyst with excellent attention to detail and IT skills.**

Eukleia is a fast-growing company which provides training services in the area of governance, risk and compliance (GRC). This includes e-learning and instructor-led training courses for the specific training needs of financial services firms and other sectors. We provide courses on a wide range of compliance and risk topics including anti-money laundering, market conduct, data protection and operational risk. Our clients include eight of the top ten banks, and many of the world's leading asset managers, insurers and commodity firms. Eukleia is part of Learning Technologies Group plc (LTG), which offers fantastic career opportunities across a global group of companies.

You will be working within a team of six reporting to the Head of Quality Assurance. Our role is to assist the business in producing high-quality computer-based training. Working for a variety of clients primarily within the financial services industry, you will be checking the functional correctness of our courses and testing their accessibility using screen reading tools. You will liaise closely with the in-house design team and perform rigorous testing procedures on all e-learning modules, in a variety of web browsers and testing platforms.

You will build upon your existing skills and gain exposure to financial services regulation and to the world of e-learning. You will also receive training on the technical platforms we use to test our courses, on Learning Management Systems, and on how we perform client-specific functional testing.

Our core working hours are 08:30 to 18:00 Monday to Friday and you would be required to work 7.5 hours daily.

We are based at Cannon Street in the City of London, with a total of around 50 employees. We offer a competitive salary and the opportunity to work in a fun and social environment that is both challenging and rewarding. Annual leave for year 1 is 20 days' holiday increasing to 25 days from year 2. In addition to a pension and life assurance, we also offer other benefits such as a travel loan.

### **Role requirements**

- Attention to detail, even when testing lengthy courses
- A clear, structured and logical approach to workflow
- Excellent computer literacy
- Enthusiasm for learning new technologies, both for functional testing on different platforms and for accessibility standards
- An eye for composition and layout
- Willingness to work fast and flexibly in a busy environment
- Some testing experience and knowledge of JIRA and screen-reading tools is desirable but not essential

**If this interests you, and you are dedicated and passionate, with excellent attention to detail, then we'd love to hear from you.**

### **How to apply**

Please e-mail your CV and covering letter to: [opportunities@eukleia-training.com](mailto:opportunities@eukleia-training.com).

**No agencies please.**
